paramics, more than just great software

Quadstone Paramics is structured into four packages giving you the choice of an option best suited to your company's size and budget. We provide both academic and commercial pricing, along with short and long term lease options, with every new purchase benefiting from twelve months access to our support and maintenance program.

In addition we pride ourselves on giving the best customer support in the industry. Our UK and US help centres, remote support, experienced staff and online services have made us the first choice for customers seeking peace of mind and a fast turnaround.

“Quadstone Paramics has been very effective in taking into consideration all suggestions we have had for new features we would like to see. We receive great help from the support team whenever we run into trouble. The Swedish Road Administration has been using Paramics for several years and the product has never ceased to amaze us. We utilised the Paramics API to integrate the product into our own application.”

Joachim Rossberg

Know IT Sweden

The four packages we provide are Desktop Edition, Standard Edition, Professional Edition and Enterprise Edition. Paramics Desktop Edition is our entry level package providing the core tools of our suite; Modeller, Processor, Analyser and Designer. Paramics Standard edition allows you to select one additional module whilst Paramics Professional Edition allows two additional modules. The additional modules, Estimator, Converter and Programmer, are all included with the Paramics Enterprise Edition package. The chart below shows the various available options.

	Paramics Enterprise	Paramics Professional	Paramics Standard	Paramics Desktop
Modeller	✓	✓	✓	✓
Processor	✓	✓	✓	✓
Analyser	✓	✓	✓	✓
Designer	✓	✓	✓	✓
OD-Estimator	✓	2	1	⊗
Converter	✓	2	1	⊗
Programmer	✓	2	⊗	⊗
Pedestrians	+	+	+	+

Package Key	✓ Included	1 Select One	2 Select Two	⊗ Not Included	+ Available Separately
